"Honoring The Beauty Of Our Planet"

by Thomas Lioutas

ARTISTS FOR
A GREEN PLANET

"For The Remembrance Of History" Oil on Canvas.

"For The Remembrance Of History" represents an interpretative philosophical concept. These impressionist-abstract works bring back to life the history of the Native Americans who lived in the desert plains of Mexico, Arizona, and California, struggling to survive. The works remind us that everything was taken away to them, even their own life, for their misfortune of being born in an area of immense wealth, gold, oil, and so forth. This fact is still a reality in present times."

"Ducks On The Lake" Oil On Canvas

Italian artist Sergio Rapetti is a self-taught painter, sculptor, and poet who has been committed to creating his vision in the arts focusing on the essence of life as a whole, ranging from beautiful landscapes, wild animals, lush forests and humanity in its raw nature cohabiting

with the environment.

The train of thought depicted in his artworks is one that honors the simple beauty of life and nature, showcasing the harmonious coexistence that people can have with its natural habitat.
